Vue in a nutshell 🐚

- Developed and maintained by the community

- Not opinionated

- Small core library for minimal setup (components, rendering, etc.)

- Large eco system of plugins and libs

- If you know HTML, CSS & JavaScript - you are ready to go

- Use VUE CLI for project setup, get inspiration from boilerplates to extend this setup

Angular in a nutshell 🐚

- All in one platform developed by google

- Totally opinionated

- Without learning TypeScript and RxJS, your Angular project will fail

- Regular releases (every ~6 months)

- Sophisticated patterns for large scale enterprise projects

- Scaffolding using the Angular CLI is pure joy
